

## SUCCESS ACCELERATION SYSTEM™

Intuition • Clearing • Activation • Healing

### Essential Questions for Research, Clearing, and Activation

#### Always proceed in this order:

1. Determine, clarify, and assess the issue/challenge/problem/topic
2. Remove the negative
3. Activate the positive
4. Apply healing treatments (if needed)
5. Get into guidance for assignment, message, etc.
6. Verify the issue/challenge/problem/topic has been fully addressed

### 0. Frequently ask these questions during the session

#### Questions to double check your work:

For example, at the beginning of the session:

- Am I prepared to work?
- Did You (High Self/Source) close the openings?
- Are there any entities to clear that are not at the Highest level of Consciousness? (such as discarnates, separates, dark entities, etc.)
- Is there anything else to do before we start?
- Will we get correct answer?
- Is this answer coming from High Self and Spirit ONLY?

#### My favorite questions (to ask regularly during any session):

- Is this answer coming from High Self and Spirit ONLY?
- Is my head (or Ego mind) in the way?
- Is my Client in the way?
- Do we have any interference(s)?

#### Another great tip:

Ask a question one way, then ask the question another way to see if the answer is congruent. If it is not congruent, it means you have interferences. In other words, your answer does NOT come from your Higher Self and Spirit/God/Universe... it comes from an entity that is messing with you.

#### Example of 2 identical questions and the follow up questions:

- Is my Client fully cleared on this issue? (Yes)
- Is there anything else to clear regarding this issue? (Yes) <= *Here the answer should be (No), it means you have interferences. (Use chart 5 to find them, then clear them.)*

- Is this answer coming from High Self and Spirit only? (No)
- Do I have interferences? (Yes) (Use chart 5 to find them, then clear them.)

## 1. Determine the issue

- Is this the right issue to work with for [Client's name]?
- Is there another more pressing issue that should be addressed?
- What % positive is [Client's name] holding on this? (Use the numbers on chart 4)
- What % negative is [Client's name] holding on this? (Use the numbers on chart 4)

**When the Client comes without a specific issue**, find a topic to work on (Use chart 1)

## 2. Research and remove the Negative

- For [Client's name] regarding [specific issue], which chart should I go to? (Use a chart 1 with the numbers)

- What energies are attached to this issue?

The answer is on chart 2. (Many energies can be present. Make sure you get them all.)

- Is there any program to clear from chart 4? ... Which one?
- Do we need to research a root cause in past life? in another (parallel, present, future, or other dimension) life?
- Can we clear this without research?
- Is there another program to clear from chart 4? (Repeat the process)

**When Past Life Research is needed:**

**Use 'Past Life Research' Practice Sheet .**

- Who was the person at that time?
  - Anyone else involved? who?
  - Who did the harm? What kind of harm (emotional, mental, physical)? If physical did it lead to death? Was it an accident?
  - What kind of discordant energy was Person A holding on Person B? (Use chart 2, find the 3-4 primary ones.)
  - Was this issue passed on from generations before (in the ancestral lineage or in the soul family)?
  - How many generations before? (Often it doesn't go higher than 9 generations back. In reality though it clears way more generations than 9. 😊)
  - Anything else we should know in order to clear this?
  - Is this enough to clear the program and past life now?
- Is there anything to clear on chart 6 regarding the issue?

- Is there any archetype to clear and rebalance on chart 6 regarding the issue?
- What type of discordant energies, on chart 2, does this archetype have?
- What positive energies, on chart 3 (2 pages), does this archetype need?

### **3. Activate the positive**

- Is there any block to a positive expression?

If YES, ask: Which positive expressions are blocked? The answer is on chart 3 (2 pages).

(Sometimes there can be 3-4 positive expressions that are blocked.

Make sure you get them all.)

- Which positive expressions could [Client's name] benefit from at this time?

or

- Which positive expressions do You recommend we apply to [Client's name] (either to help with the current issue, or in general – at the end of a session.)

### **4. Apply healing treatments (if needed)**

- Go to chart 7 and ask: which healing treatment should we apply?

### **5. Get into guidance for assignment, message, etc.**

- Does [Client's name] need to do something on the conscious level regarding the issue?
- Is there an assignment and/or a message for [Client's name]?

### **6. Verify the issue/challenge/problem/topic has been fully addressed**

- How much of this issue is cleared?
- What % of the issue still need clearing, activation, healing?
- How long will it take for the clearing to be downloaded? Is there anything else we can clear to accelerate the result?
- How open is [Client's name] to [best specific outcome]?
- How closed is [Client's name] to [best specific outcome]?
- How open is [Client's name] to receiving the full benefit of the clearing?
- How closed is [Client's name] to receiving the full benefit of the clearing?
- How open is [Client's name] to receiving the full benefit of the healing treatment?
- How closed is [Client's name] to receiving the full benefit of the healing treatment?
